SAFE SYSTEM OF WORK

AM Fire Consultants will ensure that where employees are working on clients premises the following safe system of work will be adhered to

- Personal protective equipment will be provided and worn where necessary
- Permission will be requested to work on the relevant premises
- Emergency procedures will be obtained and followed when necessary
- Management will be informed when working in remote areas
- Should it be necessary to use any mechanical or electrical equipment, adequate training will be given and manufacturers' instructions will be followed. All such equipment will be regularly inspected and serviced as per manufacturers instructions
- An investigation will be carried out, an entry will be made in the company accident book and a report produced, following any accident to an employee and/or member of the public. The authorities will be informed under RIDDOR

Signed
A E Stanley

A handwritten signature in black ink, appearing to read 'A E Stanley'.
